**Project Abstract**  
The Application

How can we keep track of a **growing number** of devices and **multi-task** efficiently without the need for a **physical connection**?

## Advantages

The Application

With our application service [M.O.S.I.S.](#) (Mobile Operating System Integrated Services) you can access [any device](#) from anywhere at anytime with [wifi](#) or [wifi Direct](#).

## Project Specs

How it works

Stream your phone UI  
to your Desktop,  
answer calls or text.

Retrieve a file from a  
device and stream it  
from your phone to a  
monitor or projector.

Plug in our streaming  
media device and  
stream any experience  
to another screen.  
Including console  
gaming.

**Marketing**  
Target Demographic

Engage Tech savvy users who enjoy rich media across a variety of platforms with an easy to use subscription based service.
